What will be the impact of AI in music?

What will be the impact of AI in music?

1. Replace composers

2. Enhance the creative process

An interesting analogy...

What will be the impact of AI in music?

1. Replace composers

2. Enhance the creative process

How AI can enhance the music creative process

- Exploring new musical ideas

- Fast music prototyping

- Infinite version of a composer

"

… I picture myself crafting [musical] ideas and then using the AI to augment variations or even other intensities […]. I see AI-assisted composition where I can curate what the AI comes out with and tweak that.

Guy Whitmore, Video Game Composer

Melodrive
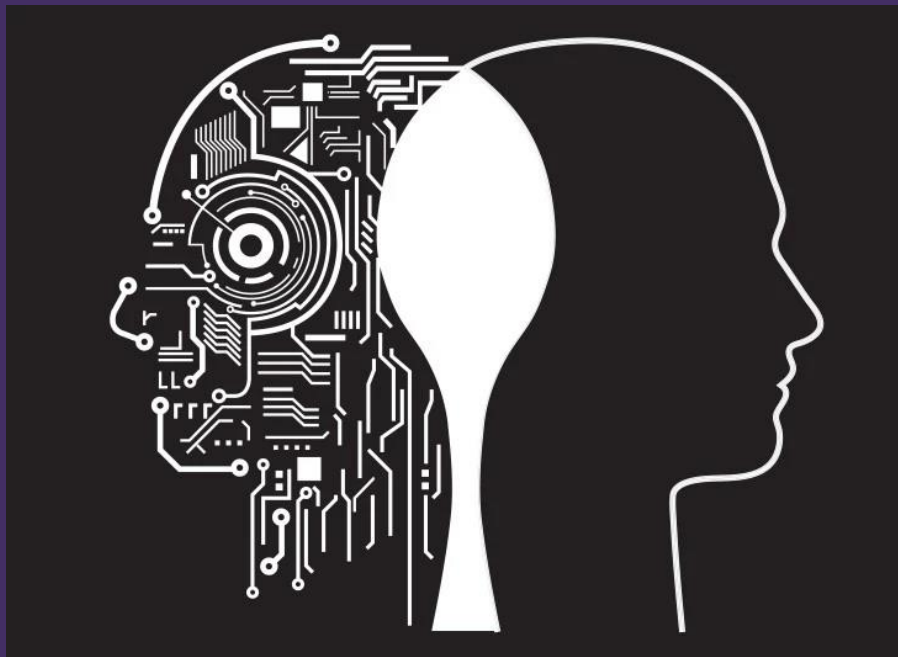

- AI music engine
- Realtime generation
- Emotionally-variable music
